COVER LETTER

Dear Hiring Team,

I hope this letter finds you well. My name is Keena Washington, and I am writing to express my strong interest in joining your team. I hold a Bachelor's degree in Software Engineering from Western Governors University, bringing a unique blend of technical expertise and proven hands-on experience in full-stack development, data analysis, and UI/UX design.

Over the course of my career, I have honed the ability to manage people and projects effectively. As a retail Manager, I oversaw daily operations, coordinated advertising campaigns, supervised employees, and successfully boosted sales by 17% in my first year. These experiences have taught me to be an adaptable leader who thrives under pressure.

In my current role as Full Stack Developer at Cash Man LLC, I design and maintain secure, web applications using C#, JavaScript, HTML, CSS, and PostgreSQL, deployed on AWS. My work focuses on building scalable, high-performance solutions and delivering intuitive interfaces that enhance user engagement.

Previously, as a Data & Web Development Specialist at Pipe Dreams, I developed and maintained an internal product showcase site, implemented a MySQL-backed inventory tracking system, and leveraged Python for sales data analysis to guide marketing strategies. This experience deepened my ability to translate business needs into technical solutions while improving operational efficiency.

Through both roles, I have strengthened my ability to manage end-to-end projects—integrating front-end and back-end systems, optimizing databases, and ensuring a seamless user experience. I am eager to bring this combination of technical skill and problem-solving ability to a role where I can contribute to innovative projects and team success.

Thank you for taking the time to review my application. I look forward to the opportunity to discuss how my background and experience align with your company's mission.

Sincerely,

Keena Andre Washington Jr.
