COVER LETTER

Dear Hiring Team,

I hope this letter finds you well. My name is Keena Washington, and I am writing to express my strong interest in joining your team. I hold a Bachelor's degree in Software Engineering from Western Governors University, supported by hands-on experience in software engineering, cloud platforms, automation, and data-driven development.

Throughout my career, I've strengthened my ability to build scalable systems and improve operational workflows. During my time at Cintas, I developed Python and JavaScript automation tools, designed SQL-based reporting models, and implemented system integrations that enhanced logistics visibility and reduced manual processes. These experiences helped me learn how to solve problems quickly, collaborate across teams, and deliver efficient internal tools.

Most recently, as a Software Engineer at Adobe, I engineered C# (.NET) and Python services, built REST APIs, and designed SQL data pipelines that improved analytics accuracy and platform reliability. I also supported Azure and hybrid-cloud initiatives, developed UI/UX dashboards for engineering teams, and contributed to CI/CD improvements that ensured secure and consistent releases.

Across both roles, I've managed end-to-end projects, optimized data flows, automated routine tasks, and built interfaces that empower teams to work more effectively. I am eager to bring this blend of technical skill, cloud experience, and practical problem-solving to a position where I can contribute to meaningful, innovative work.

Thank you for taking the time to review my application. I look forward to the opportunity to discuss how my background and experience align with your company's mission.

Sincerely,

Keena Andre Washington Jr.
